

Future is here.  
Explore BlackStar.

We believe that driving a motorcycle is about stimulating senses. BlackStar brings you freedom, adrenaline and luxury. A top speed at 450 km/h, but still 100% secure. It sounds like it might be an impossible combination, but no longer – BlackStar is one of a kind. You are the driver but the vehicle, with its smart technologies, detect dangers and intervene. Our designers and engineers always strive to accomplish the impossible.

If you own a BlackStar you are special.

### 350 HP

Feel the adrenaline with an electric engine from Black-Star. Power as a thunder, the very second you twist the throttle.

### 700 km range

The longest electric range of any motorcycle today. Recharge to full battery in just 20 minutes, and continue your adventure.

### Fast security

There is no longer need to wear a helmet or protective clothing. You're always 100% safe with BlackStar Fast Security system.

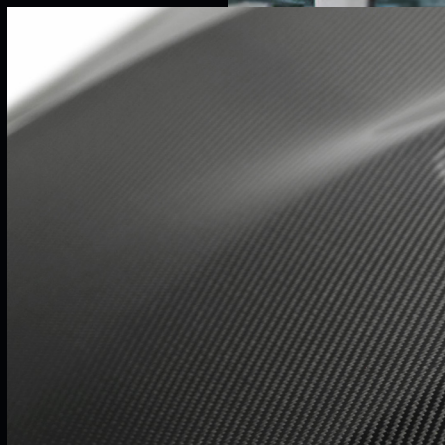

### Neodymium glass

The glass changes in color, depending on situation. If it is dark outside the glass will change to give you the best sight.

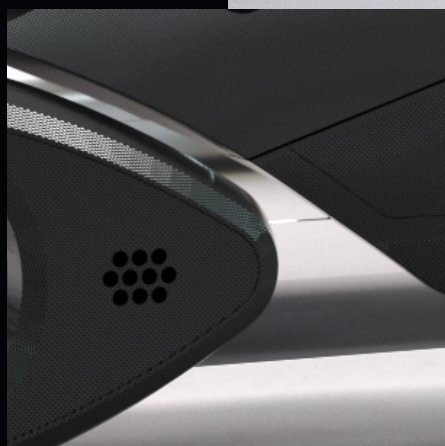

### Carbon fiber body

BlackStar has a Carbon fiber body and frame, which results in an incredible light weight at 172 kg.

### 350 HP Engine

The engine delivers a top speed at 450 km/h and torque 250 Nm.

## Riding modes

Ten selectable riding modes that electronically changes the characteristics of the motorcycle.

## BSS GPS

Keep focus on the adventure with BlackStar Smart GPS System. Select voice guidance or autopilot.

## Sound modes

The time of changing exhaust systems is gone. BlackStar has three selectable sound modes. Let cities vibrate or drive soundless in the night.
